www.burhanmohammad.github.io

Canada

A two-year veteran with a strong work ethic and skill set in software development, testing, and deployment. Good competency in a variety of programming languages; familiarity with Agile processes; the ability to create high-quality software on schedule and under budget; and strong analytical and problem-solving abilities. Organized and detail-oriented, with the ability to work quickly and flawlessly to meet deadlines. A devoted team player with a determined, analytical attitude who is committed to attaining difficult development goals.

EDUCATION**University of Alberta**

Sep 2021 - Dec 2025

- Bachelor of Science in Computer Science

WORK EXPERIENCES**Software Developer**Whistling Solutions
2021 - Present

- Created and implemented software solutions for numerous clients across a range of industries,
- Led the development of a mobile application for the company.
- Coordinated efficient large-scale software deployments through detailed specifications, collaboration with engineering team members, and performance testing.
- We examined the code, investigated issues, and fixed them, producing software that is highly reliable and of high quality.
- Met with customers to discuss project progress, collected feedback on different stages and directly addressed concerns, which resulted in a 100% satisfaction rating from the client.

PROJECTS

Developed and implemented a number of personal projects using a variety of computer languages and technologies, displaying excellent technical and problem-solving abilities, and enhancing my abilities in (Full Stack, Cloud, Databases).

Backend

Open Source

- Developed and implemented three significant **Database** projects:
 - "[E-Commerce Store Management System](#)" which reduced procedures and increased a huge Pharmacy's effectiveness.
